

CLAYESMORE

The Vision

Clayesmore is committed to becoming a sustainable centre for educational excellence. We want to be widely recognised as an innovative school which actively promotes the personal development of pupils in an inclusive and stimulating environment. Clayesmore students will have a strong sense of ethical, moral, environmental and social responsibility and will go on to become people who will make a positive impact on the lives of others.

Mission

Clayesmore supports and challenges every pupil to fulfil their potential and contribute to the world with confidence, ambition and compassion.

Clayesmore therefore has a double mission: to provide an excellent traditional education as well as to pursue a deeper transformational agenda through the cultivation of personal development. The realisation of this challenge requires a distinct and shared methodology based on strong, respectful relationships among all members of the community. Whilst this will be embedded in the day to day routines and running of the school, it will be more tangibly delivered through the LEX programme.

Aims

- Provide a strong academic platform from which students can develop a lifelong love of learning for its own sake;
- Equip students with the skills, understanding and values that will help them to live their lives well;
- Encourage values and attitudes rooted in selflessness and service, courage, integrity, compassion and generosity;
- Instil a sense of appreciation and wonder; a respect for others and our environment, and a recognition of the need to tread lightly on the world
